### D732B – SQUARE FACE HINGE

Glass to glass hinge, to mount a door to a glass side panel.

This hinge has the advantage of allowing the glass to fold back on itself through 180° angle.

The hinge is secured to the panel with one hole in the glass instead of a cut-out. This results in a simpler and cheaper glass preparation.

A minimum of two hinges required up to a maximum of 15kg.

- Solid Brass with Stainless Steel components
- Suitable for 6mm glass
- Finishes available: Bright Chrome & Satin Finish
